

# Student Learning and Wellbeing Framework

“Wellbeing is a state in which every individual realises his or her potential, can cope with the normal stresses of life, can work productively and fruitfully and is able to make a contribution to his or her community.”

– World Health Organisation, 2014

## Wellbeing – our approach

## Wellbeing – connected to learning

Our young people are growing up in a world driven by new technologies and economic globalisation. Their future means they need a new set of cognitive, social and emotional skills for success.

Healthy, confident and resilient young people who can successfully navigate a more complex world are vital for Queensland’s future.

We know that a supportive environment that combines a focus on wellbeing with a focus on learning is optimal — without one, the other will not happen.

Responding to individual and group differences, promoting collaborative learning, connecting to the hearts and minds of every student, and teaching students how to manage their wellbeing, are just some of the ways our teachers are making sure students thrive.

Our state schools must continue to provide inclusive environments that nurture the wellbeing of all students so they become resilient lifelong learners who respond positively to their changing world and pursue their passions with confidence.

## Wellbeing – measuring success

Schools can monitor their school culture and student wellbeing and engagement through:

- attendance rates
- student retention data
- learning days lost due to student disciplinary absences
- School Opinion Survey responses.

The department is developing a standardised measure of wellbeing that will provide data on the state of wellbeing of students across all Queensland state schools.

# Our approach to student learning and wellbeing across the whole school

1

Creating safe, supportive and inclusive environments

2

Building the capability of staff, students and the school community

3

Developing strong systems for early intervention

Schools do this by:

- providing safe environments where diversity is valued, positive social interactions are promoted, and risk of injury or harm is minimised
- developing an approach to wellbeing that supports the collective action of parents, support services and the wider community
- demonstrating and communicating positive respectful relationships between staff, students, parents and members of the community
- explicitly teaching and modelling social and emotional skills, values and expectations for behaviour to support student wellbeing
- making sure the physical environment and school policies and practices are accessible and inclusive of students and families
- planning for opportunities to promote and celebrate the traditions, values and cultures of the school community
- providing learning opportunities and environments that promote healthy lifestyle choices.

Schools do this by:

- providing health and wellbeing learning opportunities for students through curriculum focused on mental health, relationships and sexuality, alcohol and other drugs, food and nutrition, benefits of physical activity, and safety
- identifying opportunities to build the capabilities of teachers and school leaders to support a whole school approach to student wellbeing and its connection to learning
- communicating information and advice on the benefits of supporting young people to be healthy, confident and resilient
- responding positively to the needs of different groups within the school community
- strengthening connections with parents to support early intervention for students whose wellbeing is at risk
- increasing visibility of local support services to families whose children have higher levels of need
- supporting staff health and wellbeing and recognising the resulting benefits for students
- committing to continual improvement using evidence-based strategies to improve student wellbeing, seeking ways to develop and share new ideas.

Schools do this by:

- planning and documenting school processes to support staff to respond appropriately to students at risk
- recognising the early signs that a student's wellbeing is at risk and responding appropriately by noticing, inquiring, planning
- sharing responsibility for supporting students at risk by:
  - seeking support from Guidance Officers and the leadership team as first responders
  - encouraging students and families to access support services
  - using a wrap-around approach for students involving parents, school support services, health professionals and other agencies.

*More learning occurs in a joyous classroom where children feel safe, secure and accepted, and where they feel the teacher sees them for who they really are.*

– Diamond, 2010
